Dr. V. SUBRAMANYAM
M.Sc. (Stat) Ph.D
Director

P R E F A C E

The Directorate of Economics and Statistics Hyderabad is releasing the publication of “Agriculture Statistics at a Glance Andhra Pradesh ” every year , It gives a broad sketch of the Agricultural scenario in the state during the year. It covers the Rainfall , Seasonal conditions, Area, Productivity and Production of crops, Land Utilization particulars and other information relating to Agriculture. The Publication of Agricultural Statistics at a Glance Andhra Pradesh 2012-13 is 38th in the Series of Publication.

It is glad to inform that the Telangana State has been formed as 29th State in India comprising of 10 Districts i.e., 1.Adilabad 2.Nizamabad 3. Karimnagar 4. Medak 5. Hyderabad 6. Rangareddy 7. Mahabubnagar 8. Nalgonda 9. Warangal 10.Khammam after bifurcation from State of Andhra Pradesh on 02-06-2014 . In the Newly formed State of Telangana this Publication i.e., “Agricultural Statistics At a Glance Telangana 2013-14 “ is the First one in the series.

In this Publication the information pertaining to Time Series data on Rainfall , Crop wise and Season wise Irrigated / Un-irrigated Areas, Productivity and Production particulars of crops category wise Number and Area of Operational Holdings, Methodology for general crop estimation surveys on food and non-food crops. Live Stock Population, Production of Milk, Eggs and wool, Fish, Prawn production and Achievements under procurement of Rice, Gross State Domestic Production of Agriculture sector of Telangana , Implementation of Crop Insurance Scheme in the State , Inter State Comparison of Area, Yield , Production of Important Crops and other information relating to Agriculture is placed in.

This Publication is released Physically and also placed Electronically on the website of Directorate of Economics and Statistics Telangana, Hyderabad with a view to ensure wider circulation of the Publication.

I hope that this Publication will be useful to the policy makers, planners , Administrators , Research scholars who are dealing with Agricultural Statistics and Seasonal Conditions and it is also useful to others who are interested in Agricultural Statistics .

I wish to record my sincere appreciation to the Officers and Staff of Agricultural Section and other related Sections of Directorate of Economics and Statistics , Telangana in bringing out the Publication well within the Time .

Constructive Suggestions to improve the Quality and content will be appreciated.

HYDERABAD

**AGRICULTURAL STATISTICS
AT A GLANCE
TELANGANA 2013-14**

The Role of Agricultural Sector in State Economy is very significant. The contribution of Agriculture, Livestock, Forestry and Fishing under primary sector to the State Gross Domestic Product for the year 2013-14 is 20.6 % of total GSDP of the Telangana State. on the basis of current Prices and 62.17% of the working population is still dependent on Agriculture and allied activities . Agriculture in Telangana is mostly dependent on Rainfall. Monsoon and Seasonal Conditions play a major role in the Agricultural production. The proportion of Area under agriculture (including Fish Ponds) is 43.20% The Gross Irrigated Area is 50.32 % of Gross Area Sown in the State.

1. AREA AND SEASONAL CONDITIONS:

1.1 The seasonal conditions during the year 2013-14 on the whole were satisfactory. During the South- West Monsoon period, the state received excess rainfall of 19% against normal. During North-East Monsoon period rainfall was received 88% excess of normal. During the year 2013-14 an annual average rainfall of 1212.2 m.m was recorded as against the normal rainfall of 906.6 m.m , excess by 34%.

(in mm)			
TELANGANA	NORMAL	ACTUAL	% DEV.OVER NORMAL
(1)	(2)	(3)	(4)
TELANGANA	906.6	1212.2	34

1.2 The Gross Area Sown in the State during 2013-14 is 62.88 Lakh Hectares as against 56.90 Lakh Hectares in 2012-13, showing a significant increase i.e., 10.51 % over previous year. The Net Area Sown in the State during the year 2013-14 is 49.61 Lakh Hectares as against 46.54 Lakh Hectares in 2012-13, showing an increase of 6.60 %.

1.3 The total production of Foodgrains in the State is 107.49 Lakh Tonnes in 2013-14 as against 82.42 Lakh Tonnes in 2012-13 recording an increase of 30.42 %. The production of food grains in 2013-14 has increased due to increase of Area and Productivity of Paddy and Maize & other crops.

1.4 The Oilseeds production during 2013-14 was 8.81 Lakh Tonnes as against 8.07 Lakh Tonnes during 2012-13 registering an increase of 9.17 %, this is mainly due to increase in Areas during both Kharif and Rabi seasons during the current year 2013-2014.

2. MONSOON 2013-14

2.1 PRE-MONSOON WISE RAINFALL:

During the month of May 2013, the state received an average rainfall of 10.6 mm. as against the normal rainfall of 29.8 mm, deficit being 64.43 percent. During this month the Normal rainfall (-19 to +19%) was not recorded in any of the District , Deficit Rainfall (-20 to -59 %) was recorded in Karimnagar , Hyderabad, Rangareddy and Mahabubnagar Districts. Scanty (-60 to -99%) Rainfall was recorded in Adilabad, Nizamabad, Medak, Nalgonda, Warangal and Khammam Districts.

2.2 SOUTH-WEST MONSOON PERIOD (JUNE to SEPTEMBER' 2013)

The South west monsoon has set in over Southern parts of Telangana TELANGANA on 16th June 2013 and covered over the districts of Warangal, Karimnagar, Nalgonda, Adilabad, Khammam and Medak of Telangana State. It is further advanced into remaining parts of Telangana and thereby covered entire Telangana State on 17th June 2013.

During the month of June 2013, the state received an average rainfall of 165.2 mm as against the normal rainfall of 128.2 mm, excess being 28.9 percent. During the month of July 2013, the State received an average rainfall of 345.6 mm as against the normal rainfall of 238.6 mm, excess being 44.8 percent. During the month of August 2013, the state received an average rainfall of 184.9 mm as against the normal rainfall of 219.1 mm, deficit being -15.6 percent. During the month of September 2013, the state received an average rainfall of 155.8 mm as against the normal rainfall of 129.3 mm, excess being 20.5 percent.

During the South West Monsoon 2013 the State received an average rainfall of 851.5 mm as against the normal rainfall of 715.1 mm, excess being 19.1 percent. Excess Rainfall was received in Mahabubnagar, Adilabad, Karimnagar and Warangal Districts. Normal rainfall was received in the remaining 6 Districts of the State of Telangana.

NORTH EAST MONSOON (October to December 2013):

The South West monsoon has withdrawn from some parts of Telangana on 15-10-2013 and some more parts of Telangana on 16-10-2013 and withdrawn from entire TELANGANA on 18-10-2013. Simultaneously North East monsoon rains have commenced over and southern parts of TELANGANA on 19-10-2013.

During the month of October'2013 the state received an average rainfall of 225.4 mm. as against the normal rainfall of 98.5 mm, excess being 128.8 percent. During the month of November'13, the state received an average rainfall of 16.3 mm as against the normal rainfall of 25.2 mm. deficit being 35.3 percent. During the month of December'13 the state received an average rainfall of 1.4 mm. as against the normal rainfall of 5.5 mm, deficit being 74.5%.

During the North East monsoon 2013, the average rainfall received was 243.2 mm., as against the normal rainfall of 129.2 mm, excess being 88.2 percent. The excess rainfall was received in entire Telangana Districts except Nizamabad District. Normal Rainfall was recorded in Nizamabad District.

2.4 WINTER PERIOD: (January and February 2014)

During the winter period 2014 the average rainfall received was 1.3 mm, as against normal rainfall of 11.5 mm, deficit being 88.7 percent.

2.5 HOT WEATHER PERIOD: (March to May2014)

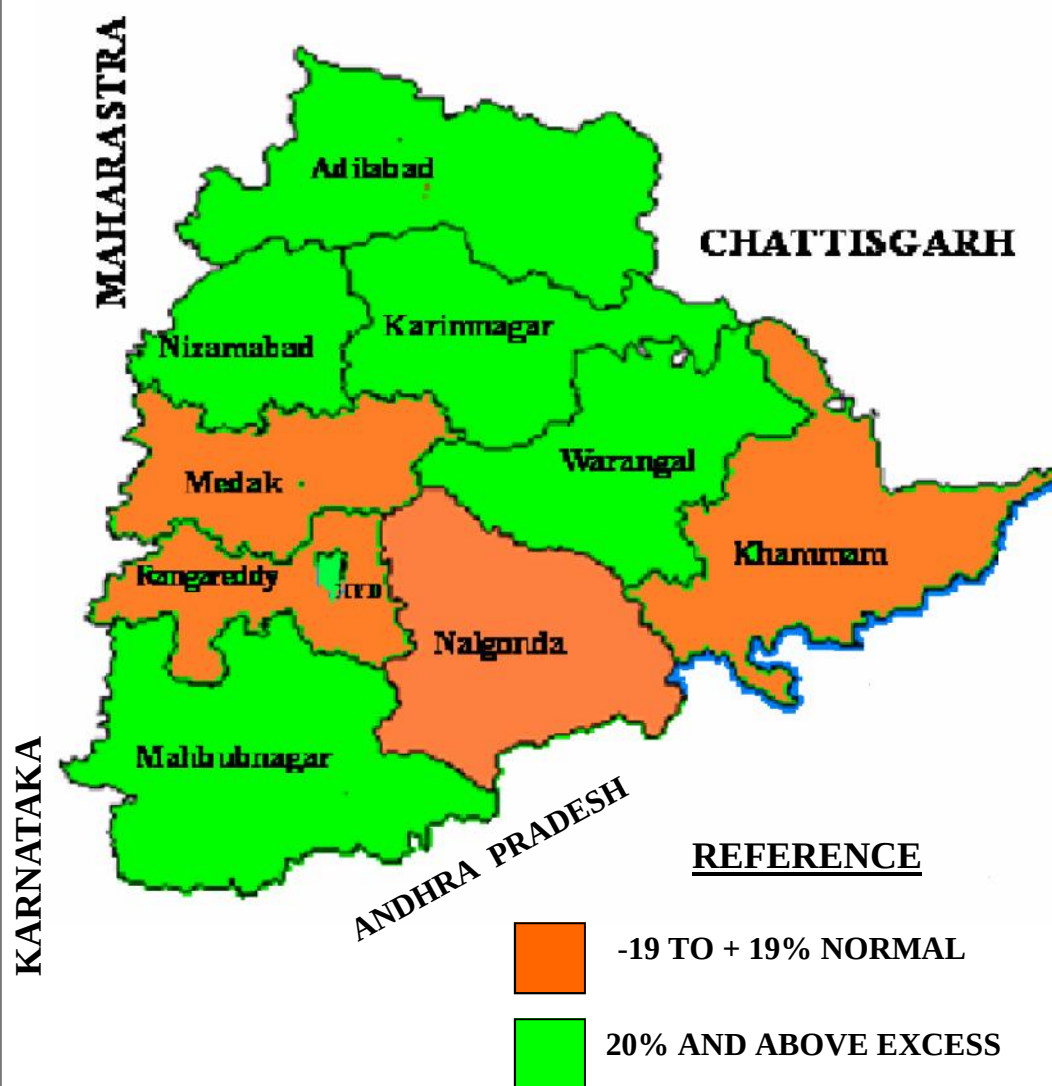

During the Hot weather period 2014 the average rainfall received was 116.2 mm, as against normal rainfall of 50.8 mm, excess being 128.7 percent.

2.6 ANNUAL RAINFALL 2013-2014:

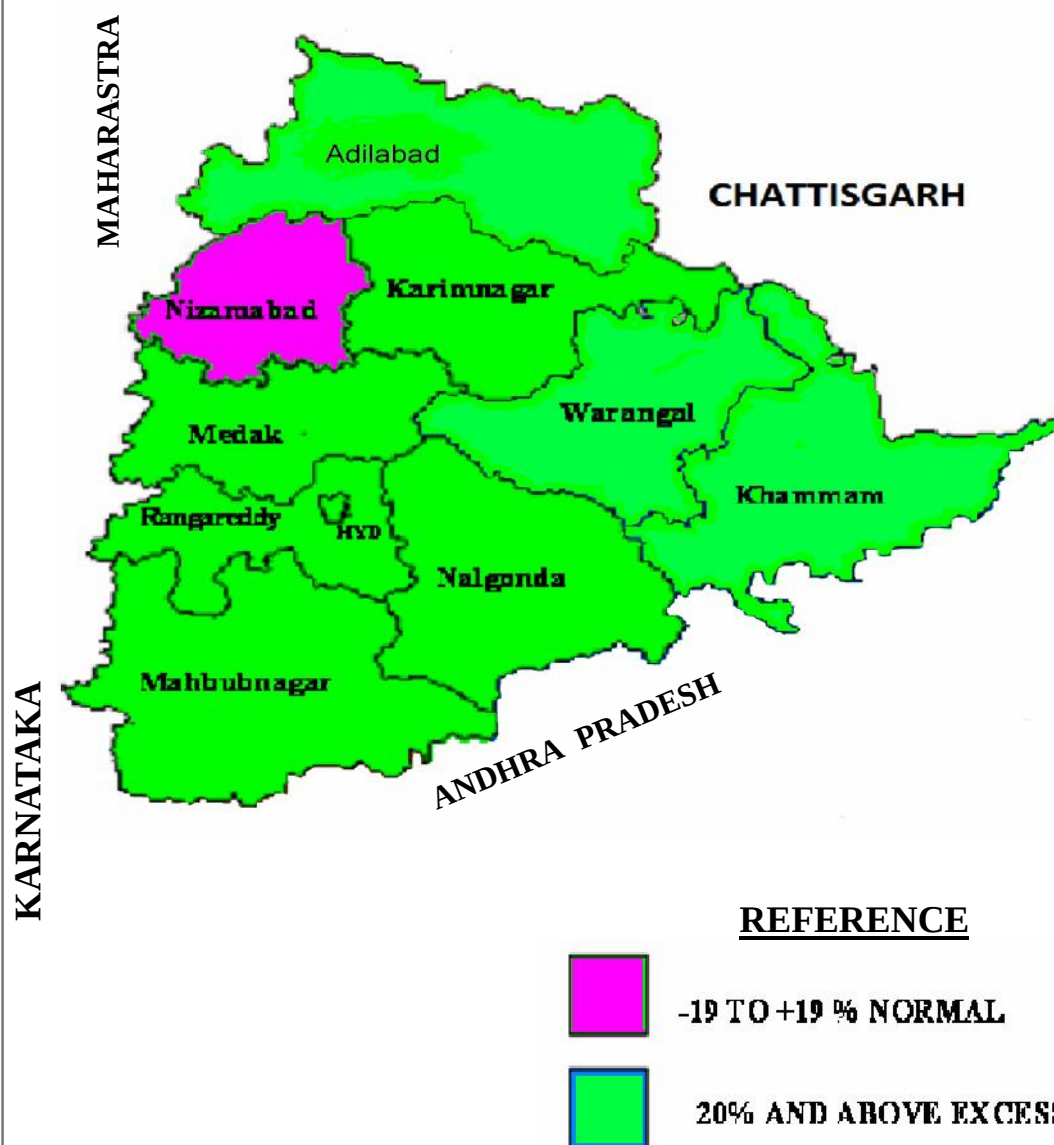

During the year 2013-14 the average rainfall received was 1212.2 mm, as against normal rainfall of 906.6 mm, excess being 33.7 percent. All the Districts (except Khammam) were received excess Rainfall. Normal Rainfall received in Khammam District.

3. LAND USE STATISTICS:

Out of the total Geographical Area of 114.84 lakh hectares in the State, Net Area Sown including Fish Culture was 49.61 lakh hectares and it constitutes 43.20 %. The area under Forest was 27.43 lakh hectares and accounted for 23.89 %.

During the year 2013-14 the Net Area Sown (including Fish Culture) is increased to 49.61 lakh hectares from 46.54 lakh hectares in 2012-13 showing an increase of 6.60 % over previous year. The details of Land Utilisation Statistics of TELANGANA are given in Table-I.

TABLE-1

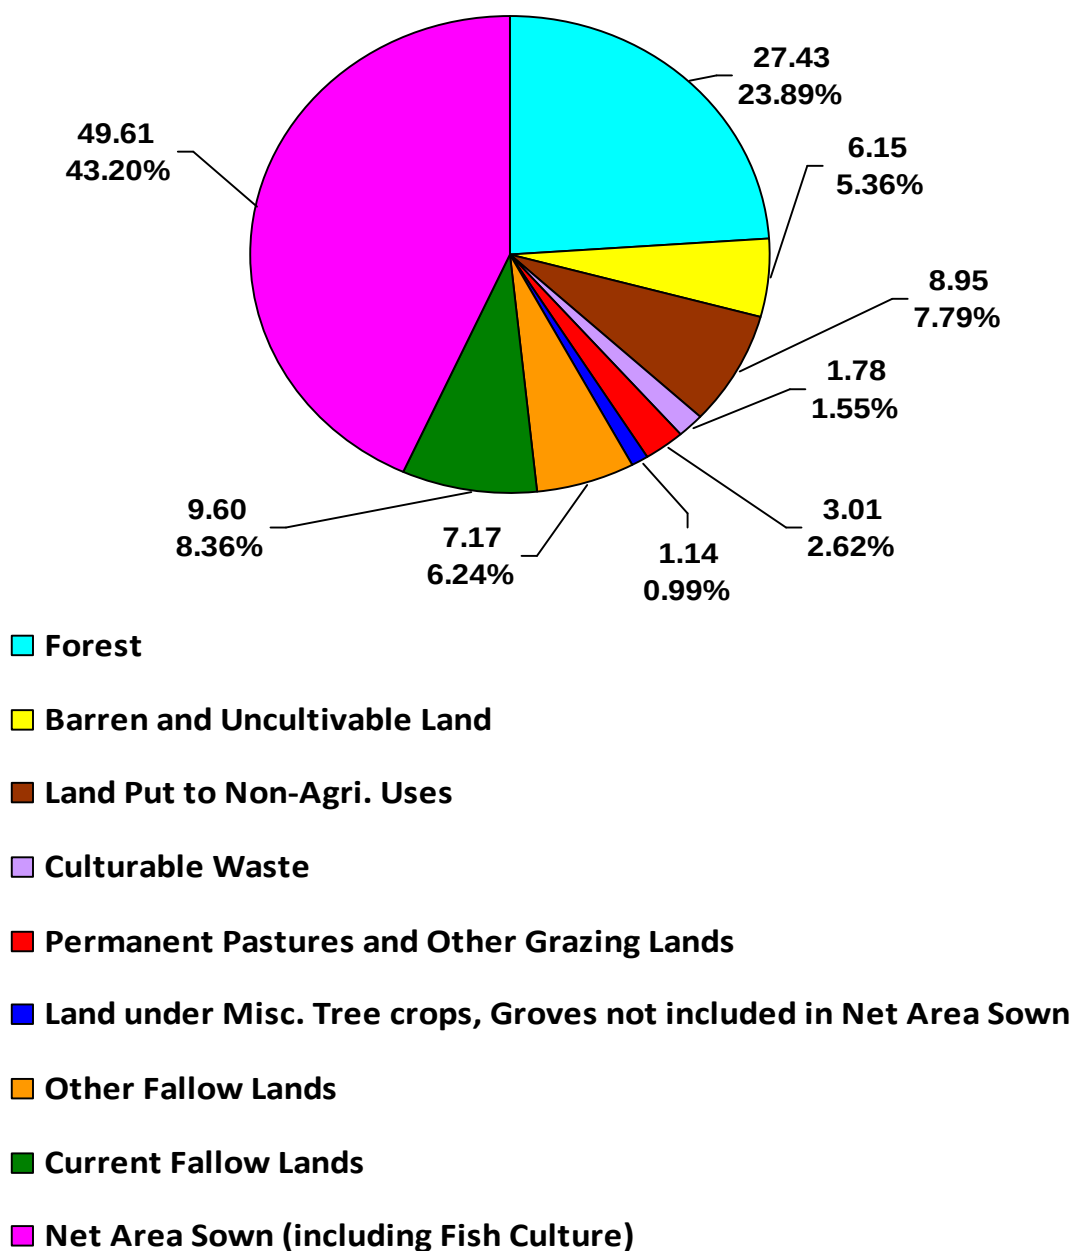

LAND UTILISATION IN TELANGANA 2013-14

SL. NO.	CATEGORY	AREA (in Lakh Hectares}	PERCENTAGES TO TOTAL GEOGRAPHICAL AREA
(1)	(2)	(3)	(4)
1	Total Geographical Area	114.84	100.00
2	Forest	27.43	23.89
3	Barren and Uncultivable Land	6.15	5.36
4	Land Put to Non-Agri. Uses	8.95	7.79
5	Culturable Waste	1.78	1.55
6	Permanent Pastures and Other Grazing Lands	3.01	2.62
7	Land under Misc. Tree crops, Groves not included in Net Area Sown	1.14	0.99
8	Other Fallow Lands	7.17	6.24
9	Current Fallow Lands	9.60	8.36
10	Net Area Sown* (including Fish Culture)	49.61	43.20

*Net Area Sown under i) **Crops** is 49.61 lakh Hectares ii) **Fish Ponds** Negligible Area.

District-wise Land Utilization Particulars for the year 2012-2013 in TELANGANA are presented in Annexure-III.

LAND UTILISATION IN TELANGANA 2013-14 (Area in Lakh Hectares and Percentage)

4. AGRICULTURAL PRODUCTION – 2013-14

The Food grain production in 2013-14 is 107.49 lakh tones as against 82.42 lakh tones in 2012-13 showing an increase of 30.42 %. Broad details of the food grains production are given in the following Table-2.

TABLE – 2
FOODGRAINS PRODUCTION IN TELANGANA

(Production in Lakh Tonnes)

SL. NO	ITEM	2013-14			2012-13		
		KHARIF	RABI	TOTAL	KHARIF	RABI	TOTAL
(1)	(2)	(3)	(4)	(5)	(3)	(4)	(5)

2	Pulses	2.40	2.31	4.71	2.91	2.00	4.91
3	Total Foodgrains	65.70	41.79	107.49	54.91	27.51	82.42

The Gross cropped area during 2013-14 is 62.88 lakh hectares as against 56.90 lakh hectares in 2012-13, showing an increase of 10.51 %.

The Area brought under food crops during 2013-14 is 39.27 lakh hectares as against 33.15 lakh hectares in 2012-13, the increase being 18.46 %. However the area under non-food crops is decreased to 23.61 lakh hectares as against 23.75 lakh hectares in 2012-13, showing a marginal decrease of 0.59 %.

TABLE-2 (a)
AREA UNDER FOOD AND NON-FOOD CROPS IN TELANGANA

(Area in lakh hectares)

SL. NO	ITEM	2013-14			2012-13		
		KHARIF	RABI	TOTAL	KHARIF	RABI	TOTAL
(1)	(2)	(3)	(4)	(5)	(3)	(4)	(5)

2	Pulses	4.08	1.55	5.63	4.53	1.58	6.11
3	Total Food grains	22.19	12.37	34.56	19.68	8.68	28.36
4	Other Food Crops	3.50	1.21	4.71	3.62	1.17	4.79
5	Total food crops	25.69	13.58	39.27	23.30	9.85	33.15
6	Total non-food crops	20.98	2.63	23.61	21.21	2.54	23.75
7	Gross Area sown	46.67	16.21	62.88	44.51	12.39	56.90

4.1 CROPPING INTENSITY:

Cropping intensity is one of the indices for assessing the efficiency of agriculture sector. The cropping intensity i.e. the ratio of gross area sown to net area sown and it is 1.27 in 2013-2014 against 1.22 during 2012-13. The level of cropping intensity moves in consonance with the behaviour of the monsoon and availability of water for irrigation .

5. IRRIGATION :

The Gross Area irrigated by all sources during the year 2013-14 is 31.64 lakh hectares. This accounted for 50.32 % of the gross cropped area as against 44.94 % during 2012-13. Source-wise Gross Area irrigated for the years 2013-14 and 2012-13 is given in Table-3.

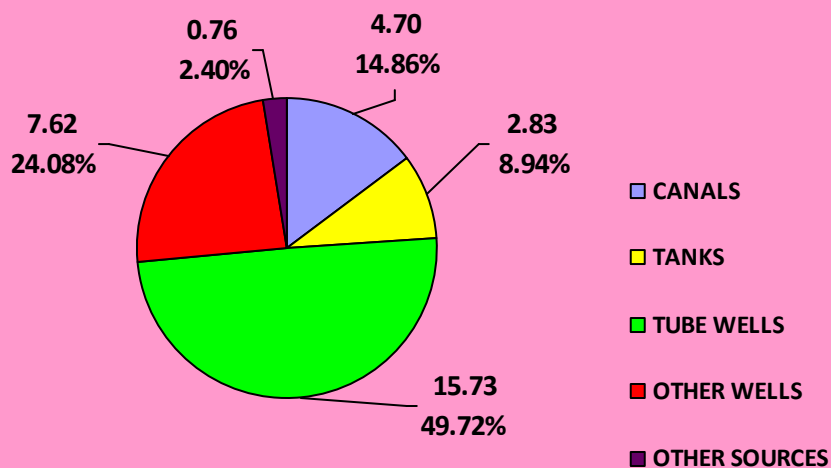

TABLE-3
SOURCE-WISE IRRIGATION

SL. NO.	SOURCE OF IRRIGATION	GROSS IRRIGATED AREA (in Lakh Hectares)			
		2013-14		2012-13	
		AREA	% OF GROSS AREA IRRIGATED	AREA	% OF GROSS AREA IRRIGATED
(1)	(2)	(3)	(4)	(3)	(4)

Total		31.64	100.00	25.57	100.00

SOURCE-WISE IRRIGATION IN TELANGANA 2013-14 AND 2012-2013

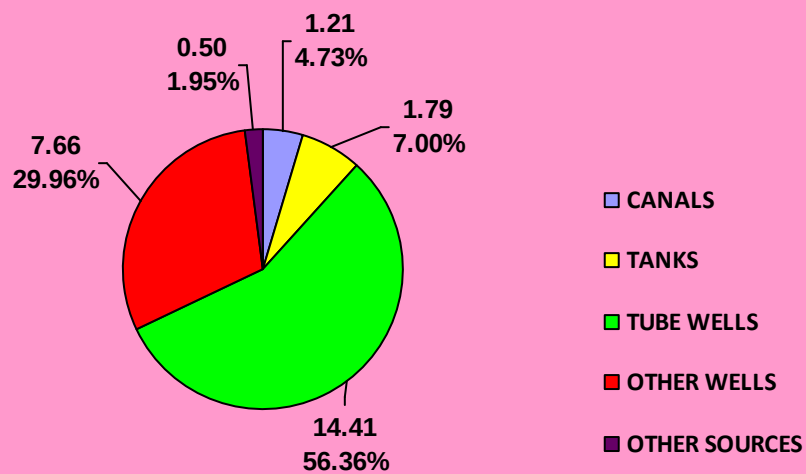

2013-14

(Area in Lakh Hectares and Percentage)

2012-13

(Area in Lakh Hectares and Percentage)

5.1 During the year the Gross Area irrigated has advanced in to 31.64 Lakh hectares as compared to 25.57 lakh hectares in 2012-13, the increase being 23.74 % and the increase is reflected under Canals , Tanks and Tubewells. The Net Area Irrigated for the year 2013-14 is increased to 22.89 lakh hectares from 17.74 lakh hectares in 2012-13, the increase being 29.03 %.

5.2 The details of Net Area irrigated by different sources of irrigation during the last 5 years for the State as a whole are presented in Annexure-V. Source-Wise and District-Wise Gross Area Irrigated, Area Irrigated more than once and Net Area Irrigated details are presented in Annexure-VI.

5.3. Out of Gross Area irrigated of 31.64 lakh hectares 61.82 % was accounted by Rice alone and followed by 8.38 % for Maize , 6.83 % for Cotton, 6.00 % for Groundnut respectively and the remaining irrigated area was covered by other crops. The particulars of Crop-wise area Irrigated by different sources in respect of some important crops are presented in Annexure-VII.

5.4. IRRIGATION INTENSITY:

The Irrigation intensity i.e. the ratio of Gross Irrigated Area to Net Irrigated Area , Irrigation Intensity during the year 2013-14 was 1.38 where in, it was 1.44 in 2012-13. The irrigation intensity is highest (i.e. 1.75) in Nizamabad District and lowest (i.e 1.19) in Karimnagar District.

6. FOODGRAIN CROPS:

6.1.1 AREA AND PRODUCTION OF FOOD GRAIN CROPS :

Rice and Maize are the Main food grain crops which together accounted for 79.89 % of the total area under food grain crops during 2013-2014.

TABLE - 4
AREA UNDER FOODGRAIN CROPS IN TELANGANA

Area in Lakh Hectares

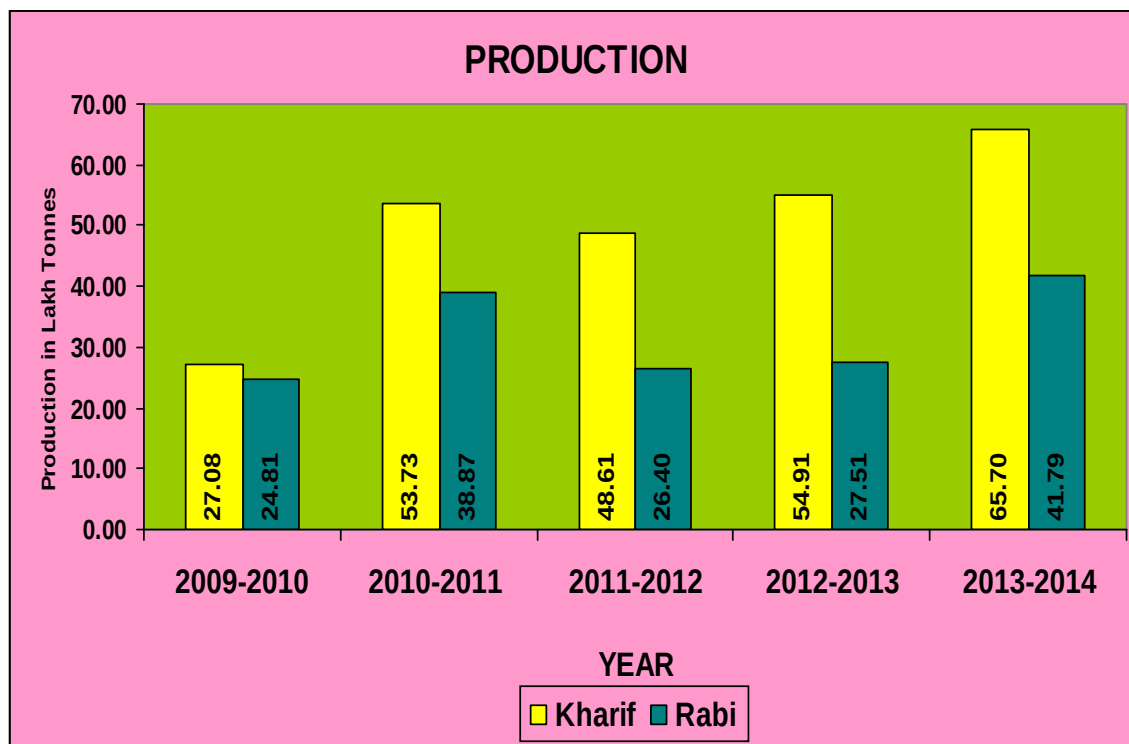

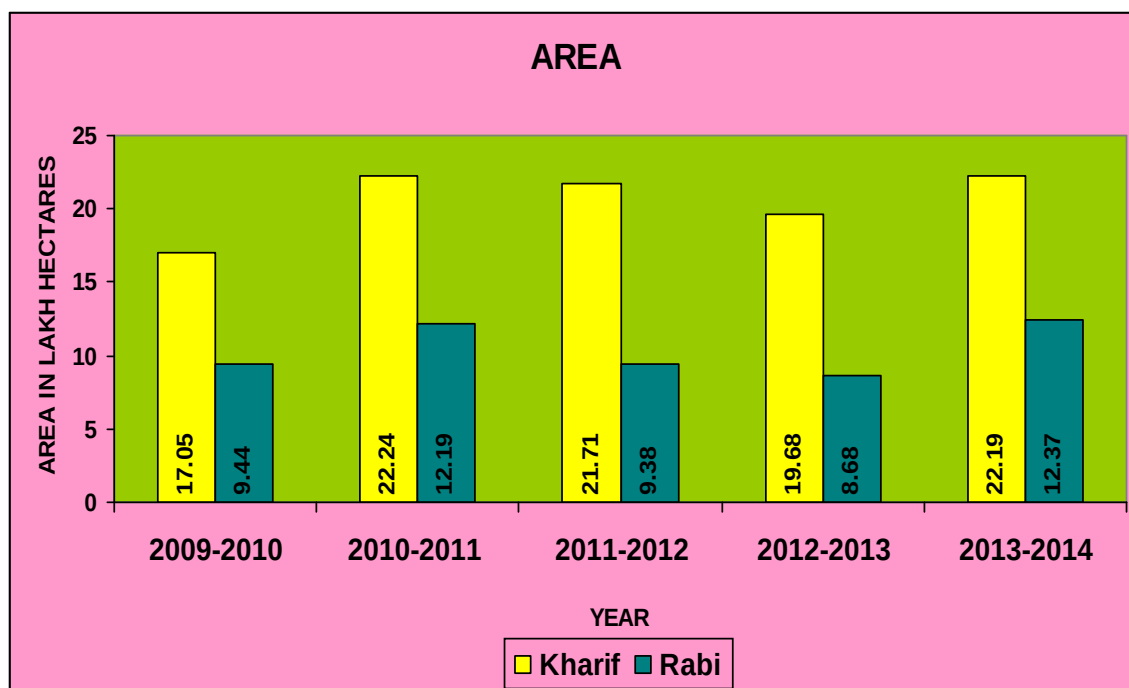

SL. NO	ITEM	2013-14			2011-2012		
		KHARIF	RABI	TOTAL	KHARIF	RABI	TOTAL
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

2	Pulses	4.08	1.55	5.63	4.53	1.58	6.11
3	Total Food grains	22.19	12.37	34.56	19.68	8.68	28.36

The area under food grains is increased to 34.56 lakh hectares during 2013-14 as against 28.36 lakh hectares in 2012-2013 showing an increase of 21.86 % over previous years area. The increase in area under Foodgrain crops is due to receipt of sufficient water in Irrigation sources and timely rainfall. The Area and Production of food grains in the State for the last five years are shown in table 4-A.

Table - 4 (A)

6.1.3: AREA UNDER TOTAL CEREALS & MILLETS:

The area under cereals & millets is increased by 6.68 lakh hect. in 2013-14 over previous year i.e., 2012-13, where in area under pulses decreased by 0.48 lakh hect in 2013-14 when compared with that of 2012-13 .

6.1.3(a) AREA UNDER KHARIF FOOD GRAINS CROPS :-

The area under food grains in kharif 2013-14 was 22.19 lakh hectares as against 19.68 lakh hectares in 2012-2013 showing an increase of 12.75 percent.

6.1.4 AREA UNDER RABI FOOD GRAINS CROPS :-

The area under foodgrains in Rabi 2013-14 was 12.37 lakh hectares as against 8.68 lakh hectares in 2012-2013 , showing an increase of 42.51 %.

6.1.5. FOOD GRAINS PRODUCTION:

The Total food grains production in the State is estimated to 107.49 lakh tonnes in 2013-14 as against 82.42 lakh tones in 2012-2013 . The production under food grains during 2013-2014, is increased by 30.42 % when compared to previous year.

The season-wise and crop-wise production under foodgrains during the year 2013-14 and 2012-2013 is shown in **Table-6**.

N = NEGLIGIBLE

6.1.6 KHARIF FOODGRAINS PRODUCTION:

The Kharif Food grains production is 65.70 lakh tonnes in 2013-2014 as against 54.91 lakh tonnes in 2012-2013, registering an increase of 19.65 % due to increase of Area under Food grain crops and major increase in Yield rate of Maize crop during the current year Kharif season.

6.1.7 RABI FOODGRAINS PRODUCTION:

The production of Food grains during Rabi 2013-2014 is increased to 41.79 lakh tonnes from 27.51 lakh tonnes in 2012-2013, showing an increase of 51.91 % when compared to previous year.

The increase of production in food grains in Rabi season is attributed to significant increase in area of Cereals and Millets and Pulses crops and productivity of Rice, Maize, Ragi, Bengalgram and Redgram crops.

6.1.8 PRODUCTIVITY OF FOODGRAINS:

The productivity of food grain crops in 2013-2014 and 2012-2013 are given in Table-7.

6.1.9 DISTRICT-WISE AREA AND PRODUCTION OF FOOD GRAINS:

District-wise Area and Production of food grains are presented in Annexure-VIII and Crop-wise, District-wise Area, Production and Productivity are presented in Annexure-9.

6.2.0 RICE:

Rice, the Major Staple food grain crop, which is predominantly irrigated, in both Kharif and Rabi seasons in all the Districts of the state. It account for 31.94 % of the total cropped area in the state during 2013-2014. The details of Area, Production and Productivity per hectare of Rice crop from 2009-2010 to 2013-2014 are given in Table-8.

**AREA, PRODUCTION AND PRODUCTIVITY OF RICE IN
TELANGANA STATE FROM 2009-2010 TO 2013-2014**

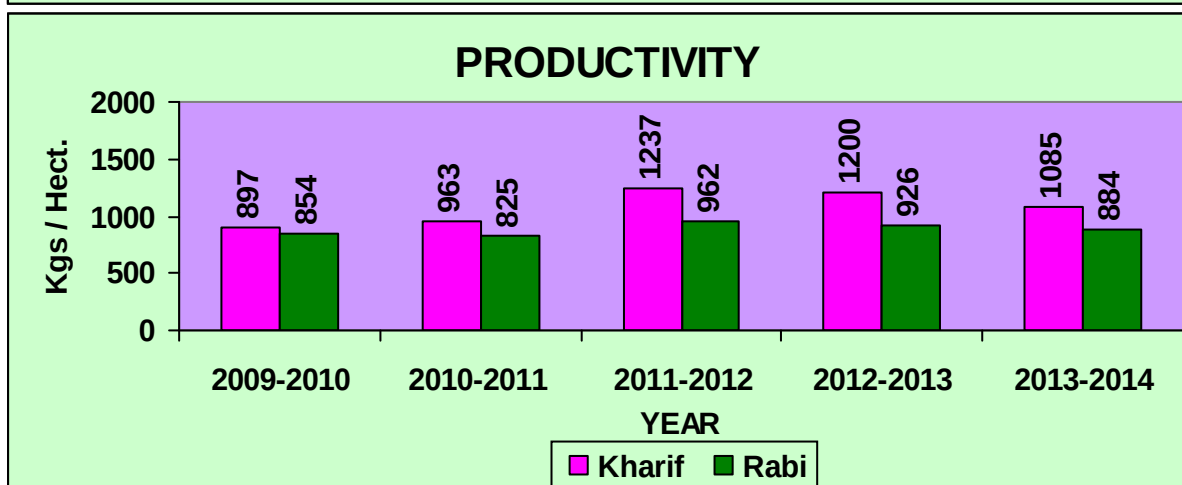

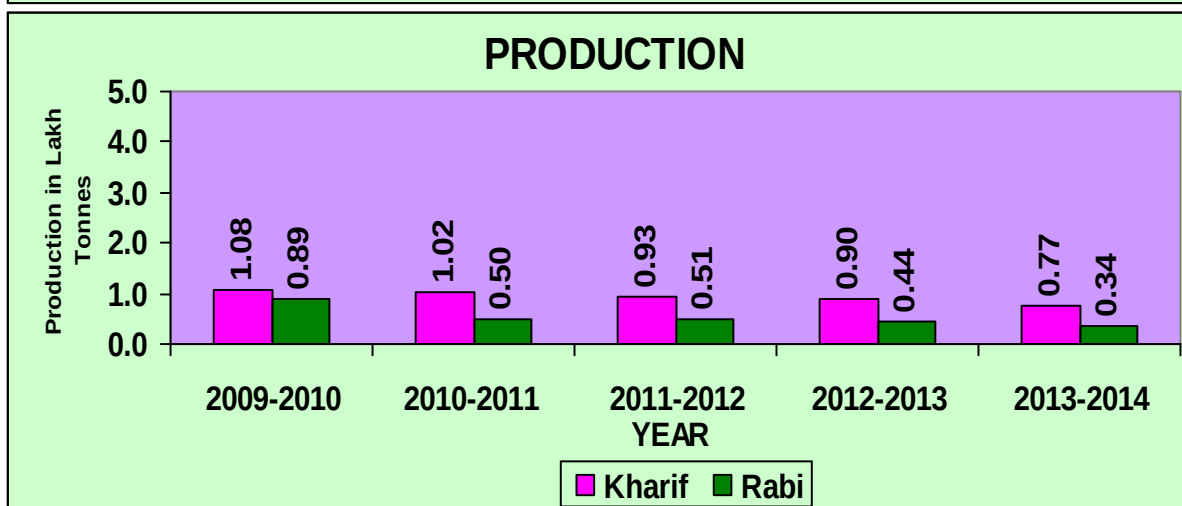

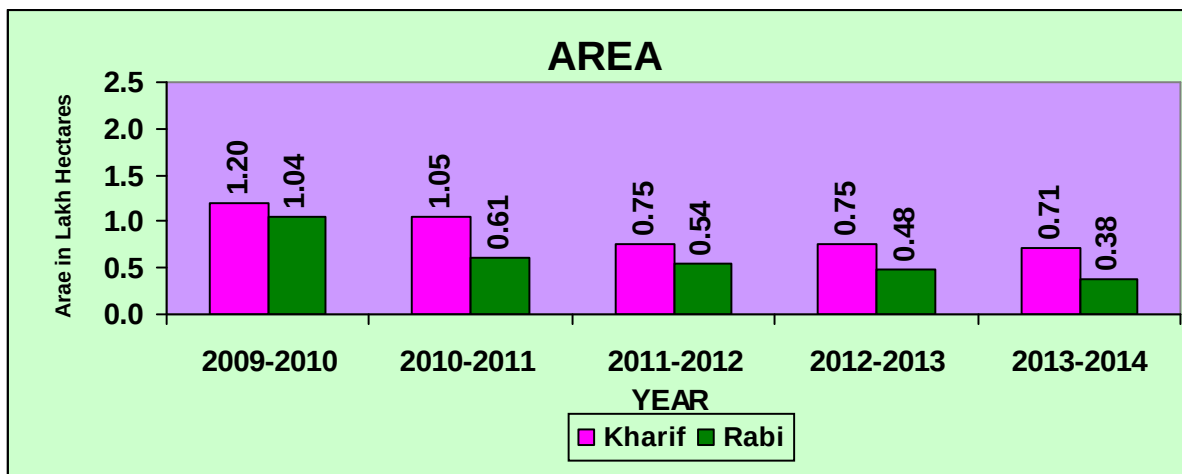

6.2.1. J O W A R :

Jowar is the principal foodgrain crop in the state which is sown in both Kharif and Rabi seasons mostly under rainfed conditions. The area under Jowar is 1.09 lakh hectares in the state during 2013-14. This crop is predominantly grown in the districts of Mahabubnagar, Adilabad, Medak, and Rangareddy which together account for 87.90 % of the total area in the state during the year 2013-14. Mahabubnagar District alone accounted for 34.15 % of the state total area. The area, production and productivity of Jowar for the last five years i.e., from 2009-2010 to 2013-2014 are shown in Table-9.

TABLE-9

IN TELANGANA STATE FROM 2009-2010 TO 2013-2014**

6.2.2 BAJRA:

Bajra crop is predominantly grown in the Districts of Nizamabad, Mahabubnagar and Karimnagar which together accounted for 89.73 % of the total area in the state during 2013-2014 , Nizamabad District alone accounted for 51.10 % of the state total area . The area, production and productivity of Bajra crop for the last five years i.e.,from 2009-2010 to 2013-2014 are shown in Table-10.

TABLE-10

6.2.3 RAGI:

Ragi crop is grown in both Kharif and Rabi seasons and predominately in the Kharif Season in the state. Total area under this crop in the state is 0.02 lakh hectares and grown in Mahabubnagar, Rangareddy and Medak Districts only during 2013-14. Mahabubnagar District alone accounts for 65.13 % of the state area under the crop. The details of area production and productivity of Ragi crop from 2009-2010 to 2013-2014 are given in Table-11.

TABLE-11

6.2.4 MAIZE :

This crop is mostly grown in Telangana state. The Districts of Mahaboobnagar, Medak, Warangal and Karimnagar are predominantly growing this crop which accounted for 72.21 % of the total area under the crop in the state during 2013-2014. Mahabubnagar District alone accounted for 22.02 % of the state area. The Area, production and productivity of Maize crop from 2009-2010 to 2013-2014 are given in Table-12.

**AREA, PRODUCTION AND PRODUCTIVITY OF MAIZE IN
TELANGANA STATE FROM 2009-2010 TO 2013-2014**

6.2.5. PULSES :

Redgram, Bengalgram, Greengram, Blackgram and few other pulses are raised in the state. Redgram and Bengalgram are mostly confined to Kharif and Rabi seasons respectively, while the remaining pulses are grown both in Kharif and Rabi seasons. The area under these pulses accounted for 8.95 % of the total cropped area and 16.29 % of the Total Area under Food grain crops in the state during 2013-2014 . 4.71 lakh tonnes of production of pulses produced in the state during 2013-14 . The production under Redgram, Bengalgram, ,Greengram and Blackgram together accounted for 97.88 % of the total production of pulses. Productivity of Bengalgram crop increased during the year 2013-14. The area, production and productivity of pulses for the last 5 years are given in Table-13.

**AREA, PRODUCTION AND PRODUCTIVITY OF
TOTAL PULSES IN TELANGANA STATE FROM 2009-10 TO 2013-14**

6.2.6 FRUITS AND VEGETABLES:

The contribution from Horticulture sector to State Gross Domestic Product is substantially increased. The commercial value and consumption of Fruits and Vegetable are also increasing from year to year. In order to estimate the yield and production of certain important Fruits and Vegetables, Yield estimation surveys on 12 fruits and vegetable crops are being conducted every year. The crops covered under yield estimates are i) Mango ii) Coconut iii) Cashewnut iv) Lemon v) Batavia vi) Banana vii) Guava viii) Tomato ix) Onion x) Bhendi xi) Brinjal and xii)Turmeric. The Area, Production and Productivity of these crops at the State level from 2009-2010 to 2013-2014 are presented in Table-14.

6.2.7 OIL SEEDS :

TELANGANA is one of the important states in the country in growing oil seed crops like Groundnut, Sunflower and Castor extensively.

The area under oil seeds excluding Coconut Crop during 2013-2014 was 5.89 Lakh hectares which constituted 9.36 % of the total cropped area in the state. The area under Groundnut alone accounted for 35.65 % of the total area under oil seeds crops during 2013-14. Out of 8.81 lakh tonnes of production of oil seeds, Palm oil, Groundnut, Soyabean, Sunflower and castor accounted Major production of the total oil seed production in the state. The Area, Production and Productivity for the last five years are given in the Table -15.

2013-2014	0.39	33.76	3.44	85884	8751

* Gur production is arrived from cane production basing on cane to Gur conversion ratio provided for Sugar Cane (P) (10.020 %) and Sugar Cane (R)(10.240 %).

GENERAL CROP ESTIMATION SURVEYS ON FOOD & NON-FOOD CROPS

For arriving at the production estimates of a crop, two parameters viz., area of a crop and productivity of a crop are necessary. Among these two parameters, the productivity estimate is much more sensitive than the area. Therefore, necessary care should be taken in following the procedures for estimating the productivity of a crop.

In order to estimate the average yields per hectare of principal crops and their total production in the State, sample surveys (Crop Estimation Surveys) based on the principles of random sampling are organized by this Directorate. Under this survey, certain number of villages for each crop is selected by adopting standard sampling techniques and crop yield per hectare (productivity) is estimated by conducting crop cutting experiments in randomly chosen fields within the selected villages.

Objective:

The objective of Crop Estimation Surveys is to obtain the estimates of average yield per hectare (productivity) and total production of principal crops, both at District and State levels by conducting crop cutting experiments. The scheme is being implemented from 1950-51 onwards in the State.

A crop cutting experiment for any specified crop involves marking of experimental plot of specified size in the selected field, harvesting, threshing and weighing of the produce obtained from it. In a specified number of cases, the produce so obtained will be stored and dried for a further period in order to determine the weight of the dried produce. The following crops are covered under this survey.

Sl. No.	Food Crops	Non-Food Crops
1	Paddy (Rice) (K & R)	Groundnut (K & R)
2	Jowar (K & R)	Sesamum (K & R)
3	Bajra (K & R)	Castor (K)
4	Maize (K & R)	Sunflower (K & R)
5	Ragi (K & R)	Soyabean (K)
6	Korra (K)	Cotton (K)
7	Redgram (K)	Chillies (K & R)
8	Greengram (K & R)	Sugarcane (K)
9	Blackgram (K & R)	Mesta (K)
10	Horsegram (K & R)	Tobacco (R)
11	Bengalgram (R)	

K – Kharif, R – Rabi

Planning and Designing:

A **Multistage Stratified Random Sampling** with the Mandal as the stratum, villages within the stratum as first stage units, the field in the selected village as the secondary unit of sampling and the plot of the specified size within the field as the ultimate unit of sampling has been adopted for carrying out crop cutting experiments.

The sample size i.e. the total number of sample villages for each crop will be fixed at the State level by the Directorate so as to give estimates of average yield with a desired degree of precision at the State level. The total number of sample villages will then be allocated to different districts and different Mandals within a district in proportion to the area under the crop in the District/Mandal. The required number of villages arrived at on the above lines will then be selected at random from the list of villages selected under T.R.A.S. Programme during the year. From each selected village two experiments shall be conducted and for this purpose two survey numbers growing the crop will be selected at random. In the selected field a plot of the specified size will be located randomly for conducting the crop cutting experiment. The procedures and techniques involved in the Survey have been finalized based on the results of pilot surveys carried out by the "Indian Agricultural Statistics Research Institute" (IASRI), New Delhi.

At State level, based on the Percentage Standard Error obtained for a crop during the previous year, the plan size of crop will be decided.

District level: The sample size at State level will be distributed to the districts in proportion to the area under the crop in the district. For this purpose, previous 3 years average area of the crop will be considered.

Mandal level: Similarly, the sample size at District level will be re-distributed among the mandals in proportion to the area under the crop in the mandal. For this purpose, previous 3 years average area of the crop will be considered.

Primary Workers:

For conducting the crop cutting experiments, the field staff is drawn from the Statistics, Agriculture, Horticulture and Sugarcane Departments. The Assistant Statistical Officers of DES working at Tahsil Office, AEOs/Agriculture Officers, Horticulture Officers for Horticulture crops, Sugarcane Inspectors for Sugarcane crops are generally be the primary workers/supervisors for conducting of Crop Cutting Experiments .

METHODOLOGY:

Selection of Villages for Crop Cutting Experiments:

Common villages are now being selected for both food and non-food crops and for Kharif and Rabi seasons. The sample villages for conducting CCE are drawn from the villages selected under the TRAS programme during current year. If sample size (i.e.) villages under a particular crop exceeds the number of villages in the current year's TRAS list, the remaining sample villages should be selected from the balance villages of the mandal.

Example: If there are 20 villages in a mandal, every year, 4 villages would be covered under TRAS. If the sample size is 6 villages, the remaining 2 villages will be selected from balance 16 villages of mandal on random basis.

During the Kharif season, experiments are planned separately for the Irrigated and un-irrigated categories of paddy.

Recording of Yield data:

1. The cleaned produce should be weighed to the nearest decagram and the results should be recorded in form II.
2. In case of Paddy, weight of the undried grain from the plot should be weighed.
3. For Jowar, Bajra, Ragi, Maize, Korra crops, weight of the undried cobs should be obtained from the plot.
4. Redgram, Blackgram, Greengram, Horsegram, Sesamum, Soyabean weight of dried seed after threshing is obtained.
5. Groundnut - weight of undried pods from the plot.
6. Castor – weight of capsules for all pickings.
7. Sugarcane – weight of cane from the plot
8. Chillies – weight of fresh chillies from each picking.
9. Mesta – number of stacks or bundles and weight of stripped plants.
10. Tobacco – number and weight of green leaves for Tobacco (Virginia) for each picking. In case of Tobacco (Natu) number and weight of green leaves.
11. Sunflower- Extracted seed should be weighted.

DRIAGE :

Immediately after the harvest is over, record the weight of the harvested produce, un-dried grain in the case of Paddy, un-dried cobs in the case of Jowar, Bajra, Ragi, Korra and Maize, un-dried pods of Groundnut weight of capsules of 1st and 2nd pickings for Castor, and weight of Kapas for 1st and 2nd pickings of Cotton in Form II. In case of Tobacco the number and weight of leaves picked in each picking are recorded in the appropriate columns of Form II and III. A final single weighment of the seed obtained in different pickings is also made on the final day by way of cross check. The produce will then be returned to the cultivator.

A BRIEF NOTE ON VILLAGE INSURANCE SCHEME:

The Village Insurance scheme is an innovative and first of its kind which was initiated in combined state of Andhra Pradesh is being implemented In Telangana State also which was newly formed state in India.

This scheme was initiated first during Kharif 2005 on pilot basis in 2 Districts Viz., Mahabubnagar and Karimnagar in Telangana and continued in Kharif 2006. During Kharif 2007, the scheme was extended to one more district i.e. Medak District of Telangana. It has been decided to implement Village Insurance Scheme in the Telangana state (except Hyderabad) from Kharif 2008 onwards with one predominant crop existing in each District. Though during 2014 Kharif, GOI decided to implement MNAIS in entire country, Government of Telangana State has decided to implement NAIS with one predominant crop as notified crop under VILLAGE INSURANCE SCHEME. The crops covered are Paddy, Maize and Soyabean.

The Primary Workers for Village Insurance Scheme are Agriculture Extension Officers (A.E.Os) of Agriculture Department and the personnel engaged purely on part time basis for this specific purpose.

A village with an area of minimum 100 Hectares under the selected crop is notified as an independent unit. If the area of the selected crop in a village/Mandal is less than 100 Hectares, then contiguous village(s) / Mandal(s) were grouped to form an Insurance Unit. Insurance units are classified into 5 different categories according to the number of villages existing in the unit and experiments are conducted as per the category shown below.

AGRICULTURAL STATISTICS AT A GLANCE 2013-14

Category code	Category Description	No of Experiments conducted
1	Single Village as a unit	4
2	More than one village but less than 6 villages	4
3	More than 5 villages but not entire mandal	10
4	Entire Mandal	10
5	Group of Mandals	16

During Kharif 2013, 4,174 Insurance Units were constituted to conduct 18,040 experiments under three selected crops viz., Paddy, Maize and Soyabean along with planning details of Kharif 2013 are given separately in Table I. During Kharif 2014, after reorganisation of units, 5,145 Insurance Units are constituted to conduct 21,744 experiments under three selected crops viz., Paddy, Maize and Soyabean along with planning details of Kharif 2014 are given separately in Table II.

The details of beneficiaries and compensation particulars under implementation of NAIS, MNAIS and WBCIS Schemes from Kharif 2000-01 to Kharif 2011-12 during Both Kharif and Rabi seasons are furnished below.

Modified National Agricultural Insurance Scheme (MNAIS)

As per instructions of the Govt. of India, Modified National Agricultural Insurance Scheme was introduced on pilot basis during Rabi 2010-11 in Warangal district and continued till Rabi 2013-14. Rice crop was covered under 'Village made as Insurance Unit'. Apart from the yield loss, the following risks will be covered under this new scheme.

Prevented sowings/planting risk: In case farmer is prevented from sowing/planting due to deficit rainfall or adverse seasonal conditions, such insured farmer will get up to 25% of the sum insured.

Localized risks: Hailstorm, landslide, etc. localized risks will also be covered under the scheme.

Post harvest losses: The insurance coverage is available even after harvest of the crop up to a maximum of two weeks from the date of harvest.

The NAIS and MNAIS in a district are mutually exclusive.

ANNEXURE-28**AGRO CLIMATIC ZONES IN TELANGANA**

Telangana State Consists of following (10) Districts :-

Mahaboobnagar, Medak, Nizamabad, Adilabad, Karimnagar, Warangal, Khammam, Nalgonda, Rangareddy and Hyderabad .

Based on the distribution of Rain fall and Soils, the state has been divided into 4 Agro-climatic zones i.e., 1) Northern Telangana Zone 2) Central Telangana Zone 3) Southern Telangana Zone and 4) High Altitude & Tribal Zone

1.Northern Telangana zone: - This zone includes the Districts of Adilabad, Karimnagar and Nizamabad. The annual Normal Rain fall is 900 to 1150mm mostly from south west monsoon. The maximum and minimum temperatures during south west monsoon range from 32°C to 37°C and 21°C to 25°C respectively. Red soils are predominant in the zone which includes chalkas, Red sands and Deep Red loams. Very deep Black cotton soils are seen in the Zone.

2.Central Telangana zone: - This zone includes the Districts of Medak, Warangal and Khammam Districts and it receives an annual Normal Rain fall of 800-1150 mm. The maximum and minimum temperatures during south west monsoon range from 22°C to 37°C and 21°C to 25°C . respectively. Red soils are predominant in the zone which includes chalkas, Red sands and Deep Red loams. Very deep black cotton soils are also seen in the zone.

3.Southern Telangana zone: - This zone comprises of the Districts of Rangareddy, Hyderabad, Mahaboobnagar and Nalgonda. The annual Normal Rain fall is 600 -780 mm. The maximum and minimum temperatures during south west monsoon range from 28°C to 34°C and 22°C to 23°C respectively. This zone is a predominantly Red soil tract having Red with loamy sub-soil i.e., chlakas.

4.High Altitude and Tribal zone: - This zone consists of the areas along the Northern and Eastern borders of the state in the Districts of Adilabad and Khammam Districts. These areas are inhabited by Tribals. The annual normal rainfall is around 1400mm and large areas at high altitudes up to 1000mm above mean sea level. The important soils Red sandy loams and Red loams with clay base with very small patches of Alluvial soils. The maximum and minimum temperatures during south west monsoon range from 29°C to 34°C and 13°C to 27°C respectively.

AGRICULTURAL STATISTICS AT A GLANCE 2013-14

Sl. No.	Name of the zone	Districts	Soil type	Important crops grown	Normal Rain fall (in mm)
1	2	3	4	5	6
1	Northern Telangana Zone	Karimnagar, Nizamabad, Adilabad	Red Earths with loamy sub soils (Chalkas) and black cotton soils.	Rice, Maize, Soyabean, Cotton, Redgram, Turmeric	900-1150
2	Central Telangana Zone	Warangal, Khammam, Medak	Red Earths with loamy soils (Chalkas), Red sandy soils and BC soils in pockets.	Cotton, Rice, Maize, Greengram, Mango, Chillies,	800-1150
3	Southern Telangana Zone	Mahaboobnagar Nalgonda Rangareddy and Hyderabad	Red soils chalks.	Cotton, Rice, Redgram, Maize, Greengram,	600-780
4	High Altitude & Tribal Areas Zone	High Altitude & Tribal Areas of Adilabad And Khammam.	Red sandy loams and patches of all Aerial soils.	Coffee, Pepper, Chillies, Rice Cotton and Horticulture crops.	1400 Around

ANNEXURE-29

CROP INSURANCE SCHEME IN TELANGANA

Object : Crop insurance scheme is primarily formulated and introduced by Govt of India to safeguard the interest of the farmers and to protect them against the element of risk and to mitigate the losses incurred by the farmers on account of natural calamities and stabilization of farm income. The risk insurance will be provided to cover yield loss due to following non-preventable risks.

A. Natural Fire and Lightning , **B.**Storm, Hailstorm, Cyclone, Typhoon, Tempest, Hurricane, Tornado etc. **C.** Flood, Inundation and Landslide. **d.** Drought, Dry spells. **e.** Pests/ Diseases etc.

In India Crop Insurance Scheme for the first time was introduced during 1972 in limited pockets of the country covering limited crops. This was optional for both states and as well as farmers. This was implemented on “Individual approach”.

Taking the demand for the scheme into consideration, the Govt. of India felt the need to make it compulsory in respect of loanee farmers in all the states. Taking the perspective in view in 1976 a committee was constituted under the Chairmanship of Professor DandeKar to go into details and modalities to make “Crop Insurance” more effective and useful to the farmers.

The recommendations of the committee were taken by the Govt. of India and the existing crop insurance scheme was revised and a farmer friendly “CCIS” (Comprehensive Crop Insurance Scheme) was implemented from Kharif 1985. The AP State Govt. as opted for the scheme and implemented during Kharif 1985 and being continued till 1998-99.

National Agriculture Insurance Scheme:

This scheme was introduced in the country in the year 1999-2000 replacing CCIS. In AP this was introduced in the year 2000-2001 and being continued. This scheme basically on the same principle as that of CCIS as regards risk coverage and yield index. However, under the scheme unlike CCIS, farmers growing notified crops and not taking loans from financial institutions can also opt for coverage. The district wise coverage of crops for the year Rabi 2013-14 and Kharif 2014-15 is as given below:

**NOTIFICATION OF AREAS PROPOSED UNDER NATIONAL CROP INSURANCE
PROGRAMME FOR TELANGANA STATE FOR KHARIF 2014**

Sl. No.	District	No. of crops Notified	Crops Notified

APPENDIX – II

CONVERSION COEFFICIENTS

For changing British Units of Weight, Length and Capacity into Metric Units.

I. Standards of Weights

1 Oz	28.3493 Grams
1 Gram	0.0352740 Ounces, 0.09 Tula
1 Pound	0.45359 Kilogram
1 Kilogram	2.20462 Pounds, 1000 Grams, 35.274 Ounces
1 Tonne (Metric Ton)	0.98420 Tons, 1000 kilograms
	10 Quintals
1 Ounce	28.350 g
1 Ton	1.01605 Metric Tons, 2240 Lbs.
1 Tonne (Metric Tonne)	1000 Kgs, 10 Quintals
1 Pound	0.037324 Metric Tons, 82.2857 Lbs. 0.4536 Kg
	0.3732 Quintal
1 Cwt	0.5010 Quintal
1 Seer	0.9331 kilogram
1 Bale of Cotton lint (392 Lbs)	0.1771 Metric Ton
1 Metric Ton	5.641 Bales
1 Bale of Jute (400 Lbs).	0.181436 Metric Ton
1 Metric Ton	5.5166 Bales of Jute

II. Standards of Area

1 Hectare	2.47105 Acres , 1000 Square Meters
1 Acre	0.404686 Hectare, 4840 Sq. Yards 4046.9 Sq . Meters (43560 Sq. ft.)
1 Sq.Mile	640 Acres, 2.59 Sq.Kilometres
1 Sq.Kilometre	0.3861 Sq.Mile, 100 Hectares 247.105 Acres
1 Sq.yard	0.8361 Sq.Metre, 9 Sq.feet
1 Sq.Metre	1.1960 Sq. Yards, 10.764 Square Feet

III. Standards of Length

1 Kilometre	0.62137 Mile, 3280.8 Feet, 1000metars ,1093.6 yards
1 Metre	1.0936 Yards, 39.36996 Inches, 3.2808 Feet
1 Yard	0.9144 metre, 91.44 Centimeters, 36 Inches
1 Inch	25.4 Millimetres, 2.54 Centimeters, 0.0254 Meters
1 Foot	30.48 Centimeters .
1 Millimetre	0.0328 Inch
1 Mile	1.6093 Kilometers
1 Chain	100 links, 20.1168 Meters, 66 Feet
13 Steps	10 Meters (Approx)
7 Steps	5 Meters (Approx)

IV. Standard of Volume

1 Cubic Inch	16.387 Cubic Cms
1 Cubic Centimeter	0.061 Cubic Inch
1 Cubic Foot	0.028 Cubic Meter
1 Cubic Meter	35.315 Cubic Feet , 1.3080 Cubic yards
1 Gallon	4.54596 Litres, 8 Pints
1 Litre	0.21998 Gallon , 1.76 Pints
1 Pint	0.5683 Litre
